Dear Families,

We have recently received reports of head lice throughout the school. Head lice are an ongoing and often reoccurring problem at most schools.

Could ALL families please carefully check their children's hair and scalp for signs of head lice and/or nits and treat accordingly, before sending your children to school. Students found to have lice should be treated accordingly before returning to school.

If you require any information on head lice please call into the office or visit www.health.vic.gov.au/headlice for extensive information about the cause and treatment of head lice.

Kind regards,

Trevor Vass
Principal
